

TRACEFORENSICS — INCIDENT INVESTIGATION REPORT

CONFIDENTIAL // AUTOMATED DFIR PLATFORM REPORT // GENERATED: 2026-10-09 11:33:40 UTC

Incident Title:	Security Incident: Suspicious Activity Detected on User 'admin'
Incident ID:	6bd0f5d2-53ce-4cc6-9d25-6e7d7f5d1943
Status:	Open
Severity:	Critical
Created At:	2026-10-09 11:33:40 UTC
Lead Analyst:	analyst

1. Executive Summary & Overview

Auto-correlated incident derived from 9 alert(s) involving entity User 'admin'. Alerts include: Successful Authentication Post Repeated Failures, Repeated Failed Authentication (Brute Force), Login Activity from Suspicious External IP, Suspicious Process Command Execution

2. Triggered Detection Rules & Security Alerts

Rule Code	Rule Name	Severity	Trigger Reason
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-003	Suspicious Process Command Execution	High	Suspicious process or command execution detected: cmd.exe
RULE-006	Login Activity from Suspicious External IP	Medium	Authentication observed from anomalous IP address: 185.220.101.5
RULE-001	Repeated Failed Authentication (Brute Force)	High	Multiple failed authentication attempts (3) for user 'admin' within 15 minutes.
RULE-002	Successful Authentication Post Repeated Failures	Critical	Successful login for user 'admin' following 4 recent authentication failures.

3. Chronological Incident Event Timeline

Timestamp (UTC)	Host	User	Event Type	Description
-----------------	------	------	------------	-------------

2026-10-09 10:00:01	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49152 ssh2
2026-10-09 10:00:01	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49152 ssh2
2026-10-09 10:00:01	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49152 ssh2
2026-10-09 10:00:15	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49154 ssh2
2026-10-09 10:00:15	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49154 ssh2
2026-10-09 10:00:15	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49154 ssh2
2026-10-09 10:00:29	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49158 ssh2
2026-10-09 10:00:29	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49158 ssh2
2026-10-09 10:00:29	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49158 ssh2
2026-10-09 10:00:45	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49162 ssh2
2026-10-09 10:00:45	FINANCE-SRV0 1	admin	SSH_LOGIN	Failed password for admin from 185.220.101.5 port 49162 ssh2
2026-10-09 10:01:05	FINANCE-SRV0 1	admin	SSH_LOGIN	Accepted password for admin from 185.220.101.5 port 49170 ssh2
2026-10-09 10:01:05	FINANCE-SRV0 1	admin	SSH_LOGIN	Accepted password for admin from 185.220.101.5 port 49170 ssh2
2026-10-09 10:01:20	FINANCE-SRV0 1	admin	PROCESS_EXEC	whoami /priv
2026-10-09 10:01:20	FINANCE-SRV0 1	admin	PROCESS_EXEC	whoami /priv

4. Evidence Integrity & Cryptographic Checksums (SHA-256)

Filename	SHA-256 Checksum	Acquisition Time
Synthetic_brute_force_attack .csv	716f1a198389e235a8a85e4bd3310251816e1f53f01a3e3c5a32a65240f129ca	2026-10-09 11:33:40 UTC

5. Analyst Notes & Conclusions

No analyst notes recorded yet.

LEGAL DISCLAIMER & LIMITATIONS: This document was generated automatically by TraceForensics Automated DFIR Platform. Rule-based detections identify suspicious activity patterns but do not conclusively prove malicious intent or compromise. SHA-256 evidence hashing and local audit logs demonstrate integrity within this application framework but do not constitute a legally certified, tamper-proof chain of custody required for judicial proceedings.
