

# TRACEFORENSICS — INCIDENT INVESTIGATION REPORT

CONFIDENTIAL // AUTOMATED DFIR PLATFORM REPORT // GENERATED: 2026-10-09 11:35:59 UTC

|                 |                                                                 |
|-----------------|-----------------------------------------------------------------|
| Incident Title: | Security Incident: Suspicious Activity Detected on User 'admin' |
| Incident ID:    | e38174e6-4ec6-4b77-86b9-1f7e3fc84802                            |
| Status:         | Open                                                            |
| Severity:       | Critical                                                        |
| Created At:     | 2026-10-09 11:35:59 UTC                                         |
| Lead Analyst:   | analyst                                                         |

## 1. Executive Summary & Overview

Auto-correlated incident derived from 9 alert(s) involving entity User 'admin'. Alerts include: Suspicious Process Command Execution, Login Activity from Suspicious External IP, Successful Authentication Post Repeated Failures, Repeated Failed Authentication (Brute Force)

## 2. Triggered Detection Rules & Security Alerts

| Rule Code | Rule Name                                        | Severity | Trigger Reason                                                                  |
|-----------|--------------------------------------------------|----------|---------------------------------------------------------------------------------|
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-003  | Suspicious Process Command Execution             | High     | Suspicious process or command execution detected: cmd.exe                       |
| RULE-006  | Login Activity from Suspicious External IP       | Medium   | Authentication observed from anomalous IP address: 185.220.101.5                |
| RULE-001  | Repeated Failed Authentication (Brute Force)     | High     | Multiple failed authentication attempts (3) for user 'admin' within 15 minutes. |
| RULE-002  | Successful Authentication Post Repeated Failures | Critical | Successful login for user 'admin' following 4 recent authentication failures.   |

## 3. Chronological Incident Event Timeline

| Timestamp (UTC) | Host | User | Event Type | Description |
|-----------------|------|------|------------|-------------|
|-----------------|------|------|------------|-------------|

|                        |                   |       |              |                                                                   |
|------------------------|-------------------|-------|--------------|-------------------------------------------------------------------|

5. Analyst Notes & Conclusions

No analyst notes recorded yet.

**LEGAL DISCLAIMER & LIMITATIONS:** This document was generated automatically by TraceForensics Automated DFIR Platform. Rule-based detections identify suspicious activity patterns but do not conclusively prove malicious intent or compromise. SHA-256 evidence hashing and local audit logs demonstrate integrity within this application framework but do not constitute a legally certified, tamper-proof chain of custody required for judicial proceedings.
